CVSI offers new perimeter detection systems

June 12, 2008

Raleigh, NC – Carolina Video Security Inc (CVSI), a North Carolina based security systems integrator, is pleased to announce that it now offers perimeter intrusion detection products from Southwest Microwave.

“Many of our customers have depots and outdoor storage areas that are ideal targets for theft”, said Brad Silvernail, President of CVSI. “In the past, outdoor intrusion systems could not meet the level of detection of in-building intrusion detection systems. Southwest Microwave provides a whole suite of tools to help protect our customer’s property and fence perimeters”, added Silvernail.

About Southwest Microwave –

Southwest Microwave, Inc., Security Systems Division produces the world's most complete line of electronic perimeter intrusion detection systems to meet the security demands of harsh exterior environments. Today, over 40,000 Southwest Microwave systems are in operation in over 70 countries worldwide in nuclear generating stations, correctional institutions, military bases, industrial facilities - areas that by their intrinsic nature dictate high performance and unyielding reliability. Bringing the latest technology to the security market, Southwest Microwave provides the foundation and experience for long term solutions.

About CVSI –

Carolina Video Security, Inc. (CVSI) provides, installs and maintains commercial and industrial physical security systems including advanced surveillance, intrusion and access control solutions. We solve challenging design, environmental and networking requirements and employ the most advanced -- proven and reliable -- technologies to help protect your employees, facilities and operations.
