CVSI expands line-up of Mega-Pixel IP Cameras

January 15, 2008

Raleigh, NC – Carolina Video Security Inc (CVSI), a North Carolina based security systems integrator, is pleased to announce an expanded product line-up of mega-pixel IP cameras from its authorized partners IQinvision, AXIS and ACTi.

Featured mega-pixel product announcements include IQinvision's IQEye Sentinel Series, AXIS's 209MFD low-profile dome and ACTi's new 56XX Series.

"The IP network camera trend is continuing to win over analog camera systems", said Brad Silvernail, President of CVSI. "Now we are seeing more deployments that incorporate mega-pixel cameras. These offer the equivalent performance of three standard resolution cameras and incredible picture detail. The improved capability and economic trade-off make a significant difference." Silvernail added "Fuzzy pictures from old security systems make identification impossible. No identification, no prosecution".

CVSI offers one of the broadest product line-ups in the state with mega-pixel cameras available in 1, 2, 3 and 5 million-pixel resolutions and indoor/outdoor, dome, bullet and conventional CCTV camera packages. These mega-pixels cameras feature power-over-Ethernet (PoE) for simplified installation and video quality equal to or greater than HDTV.

About CVSI –

Carolina Video Security, Inc. (CVSI) provides, installs and maintains commercial and industrial physical security systems including advanced surveillance, intrusion and access control solutions. We solve challenging design, environmental and networking requirements and employ the most advanced -- proven and reliable -- technologies to help protect your employees, facilities and operations.
