

Carolina Video Security, Inc.

INTERVIEW RECORDING

The **Case Information Media Management (CIMM)** solution is designed specifically for law enforcement and exceeds the requirements of North Carolina's mandate for recording custodial interrogations.

The CIMM application software offers comprehensive content organization and archiving for multiple interview rooms and multiple investigators. Simple, reliable operation is controlled through a single on/off switch with independent record indicator light. Interview recording can be continuous for hours with no need to change media. In addition, interviews can be audibly and visually monitored both locally (via an LCD display and speaker) and/or remotely (via a PC with network connection and web browser).

CIMM is offered by Carolina Video Security, Inc. (CVSI) in a turn-key package for a complete interview recording system utilizing high quality commercial grade equipment and professional certified installers.

The CIMM recorder captures high quality audio and video evidence with an embedded secure hash authentication feature. The CIMM application is a full case management solution which archives the interview recordings from the recorder, incorporates key case data and exports case information in multiple formats. CIMM provides the investigator with tools to im-

port other media such as audio recordings, third-party video from surveillance systems or in-car cameras, digital photos and documents such as Word or PDF.

CIMM also provides the investigator with tools to export the video onto a standard DVD video disc to be played on a standard DVD player and entire multi-media case files on DVD data discs for authentic organized evidence you can take to court or deliver to other Criminal Justice stakeholders.

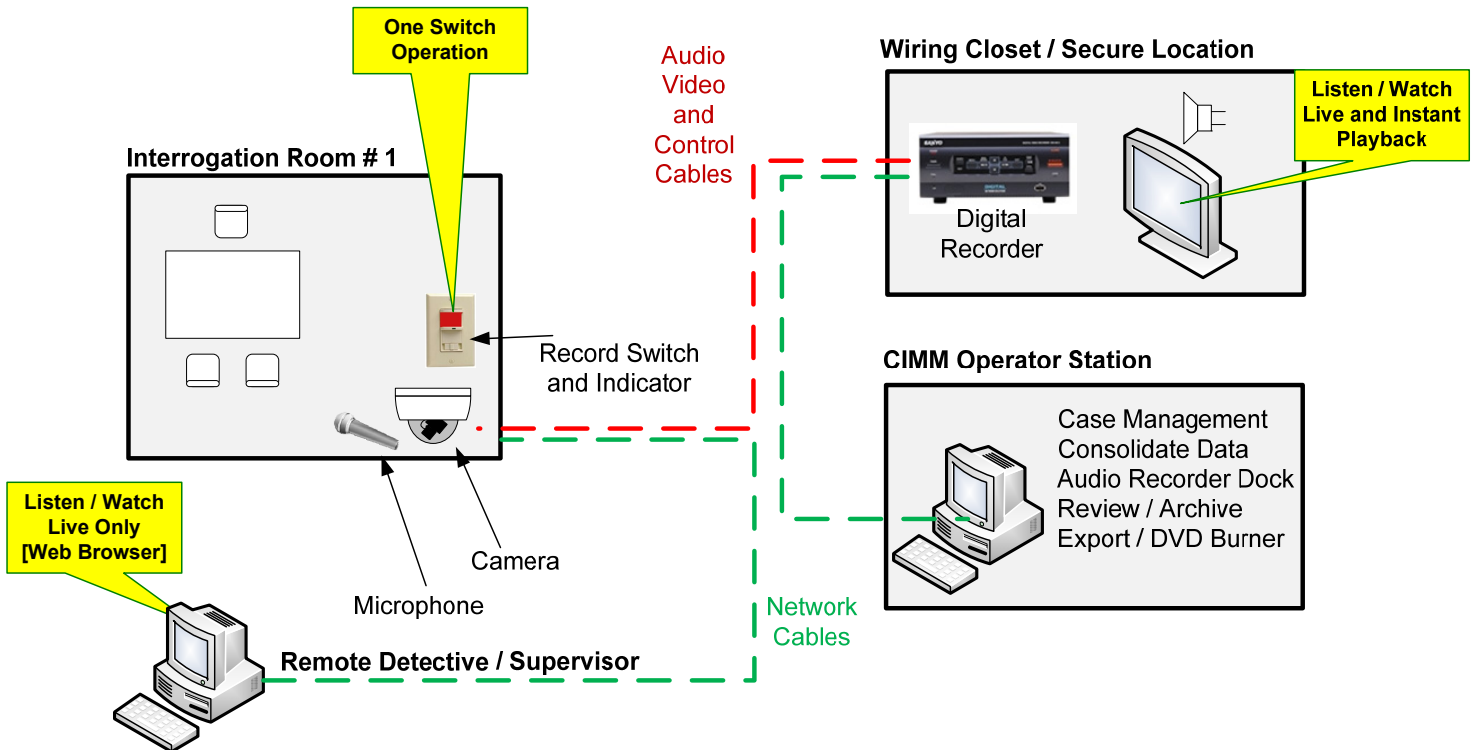

Meet or exceed the requirements of the legislation for custodial interrogations and provide more reliable, comprehensive documentation of case investigations.

The CIMM interview recording and case management solution supports recorders from Sanyo Fisher Company and CAMAC and both analog and IP cameras.

CVSI—we help you build a better case.

- **One-Button Recording for Ease of Use**
- **Multiple Options for Media File Import and Export**
- **Real-Time Remote Viewing and Access to Archive via Network**
- **Organized Case Information Including Other Media Files**

ABOUT CVSI

Our Company

Carolina Video Security, Inc (CVSI) provides, installs and maintains commercial and industrial physical security systems including advanced surveillance, intrusion and access control. CVSI also develops specialized law enforcement solutions for interview recording, video arraignment and in-field forensic video capture. We solve challenging design, environmental and networking requirements and employ the most advanced -- proven and reliable -- technologies to help protect your employees, facilities and operations. We are experts in IP networking, wireless communications, information and physical security technology. Our staff have years of experience in video technology and wireless communications.

Our Solutions

- Commercial and Industrial Video Surveillance
- Access Control
- Intrusion Detection and Burglar Alarm Systems
- Video Conferencing Systems
- Interview Recording Systems
- Wireless Infrastructure
- Security Power Systems / Solar

Our Solutions

- Physical Site Security Consulting
- System Planning, Design and Implementation Professional Services
- 24/7 Intrusion Alarm Monitoring
