MASS NOTIFICATION SYSTEMS

Mass Notification Systems (MNS) are an essential tool for Emergency Response and voice-based systems are the foundation of any MNS. Well known alert tones followed by recorded or live voice messages can be broadcast to some or all of a campus or facility.

CVSI is experienced in developing comprehensive physical security plans for campuses and commercial/industrial facilities including the latest in MNS systems and technology.

MNS systems can economically reach all buildings and outdoor venues through an existing or new IP-based backbone (wired or wireless). Individual buildings are equipped with efficient and effective self-amplified speakers and horns. Additional speakers and horns to insure good voice quality in hard to reach locations are easily deployed over CAT5 structured cabling. ADA compliant strobe lights operate in conjunction with any tone or message to alert hearing impaired.

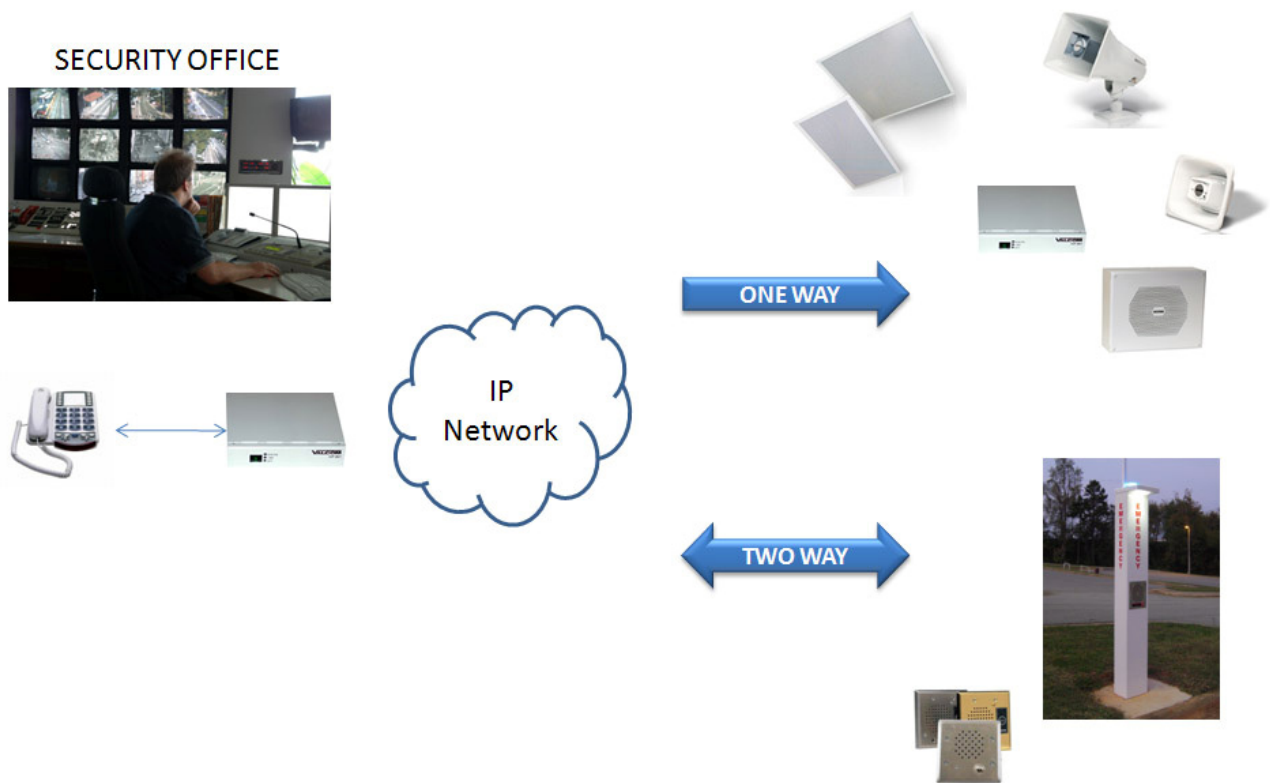

The MNS can include two-way devices allowing students or faculty to immediately contact security staff for assistance or to inform the security office of an emergency.

Centralized control of the MNS can be placed in the Security Office with one or more back-up locations anywhere on campus.

- **Campus-Wide Voice and Tone Alerts**
- **Two-Way Capable for Call Boxes and Door Stations**
- **Standards-Based VoIP Technology**
- **IP-Backbone / Distributed Intelligence**
- **SIP H.323 Compliant and Compatible with Most IP-Based Phone Systems (Including Cisco)**
- **Live or Recorded Messages**
- **Program Any Station into a Group/Zone and Send Messages to One Building or All Buildings**
- **Can be Controlled from Multiple Locations—Security Office and Emergency Back-up Sites**

“Voice-based notification systems are the single most effective tool for Emergency Alerts. They directly reach the affected population with the ability to tailor a live message to the immediate situation”

MASS NOTIFICATION SYSTEM—VOICE

ABOUT CVSI

Our Company

Carolina Video Security, Inc (CVSI) provides, installs and maintains commercial and industrial physical security systems including advanced surveillance, intrusion and access control. CVSI also develops specialized law enforcement solutions for interview recording, video arraignment and in-field forensic video capture. We solve challenging design, environmental and networking requirements and employ the most advanced -- proven and reliable -- technologies to help protect your employees, facilities and operations. We are experts in IP networking, wireless communications, information and physical security technology. Our staff has years of experience in video technology and wireless communications.

Our Solutions

- Commercial and Industrial Video Surveillance
- Access Control
- Intrusion Detection and Burglar Alarm Systems
- Video Conferencing Systems
- Interview Recording Systems
- Wireless Infrastructure
- Security Power Systems / Solar
- Mass Notification Systems

Our Services

- Physical Site Security Consulting
- System Planning, Design and Implementation Professional Services
- 24/7 Alarm and System Monitoring

CVSI Mass Notification System solutions feature products and technology by Valcom and Class Connection by Valcom.
